

Pauk

cloud manufacturing execution system

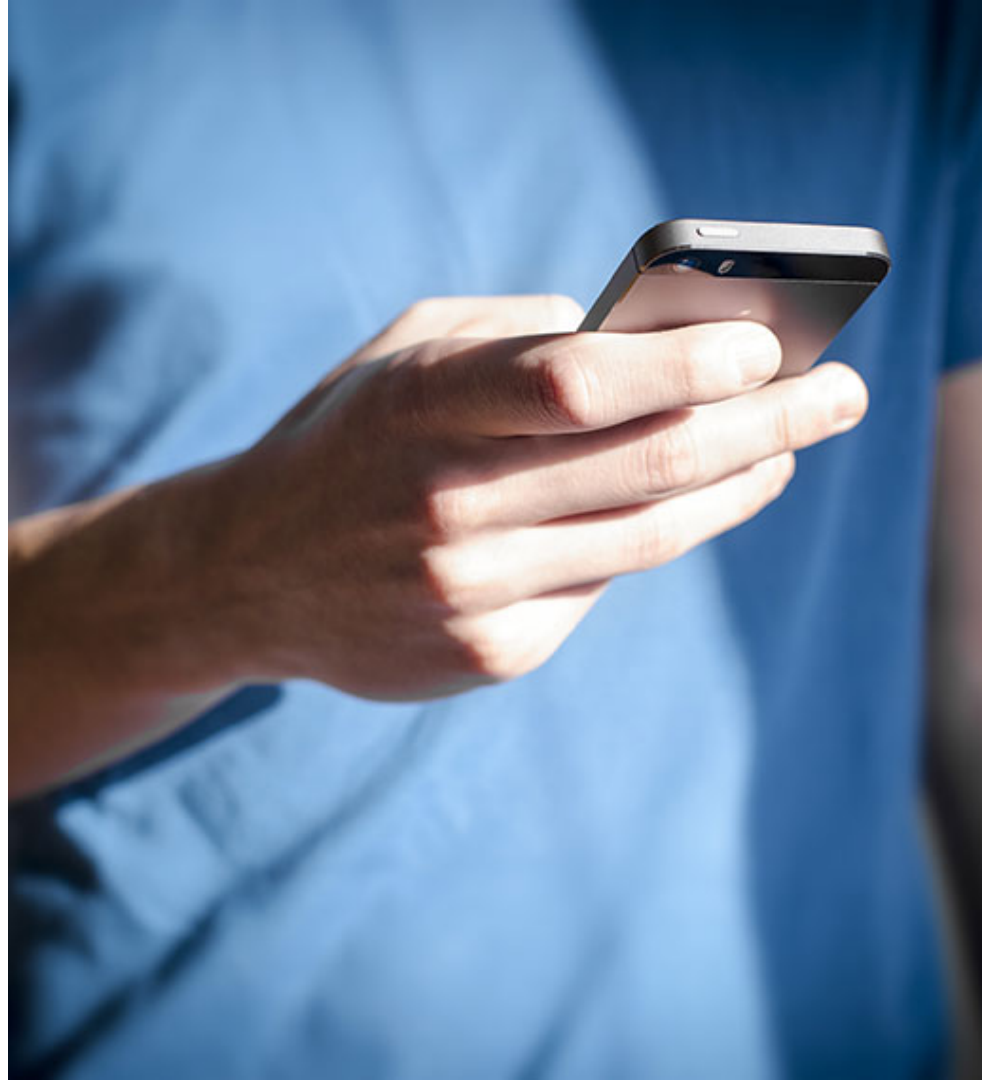

PAUK Software

Maximum transparency
and control of entire
manufacturing process
in **real time**, at any
moment ...

... wherever you are.

PAUK *Smart Systems Features*

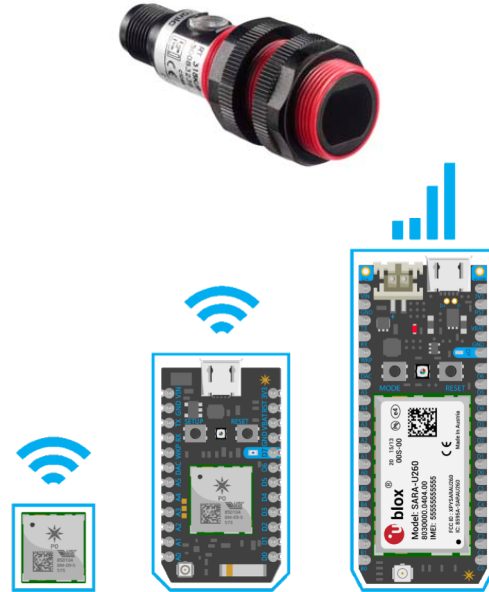

PAUK cloud based solution

IIoT machine supervision

Fast and easy implementation

Simple maintenance

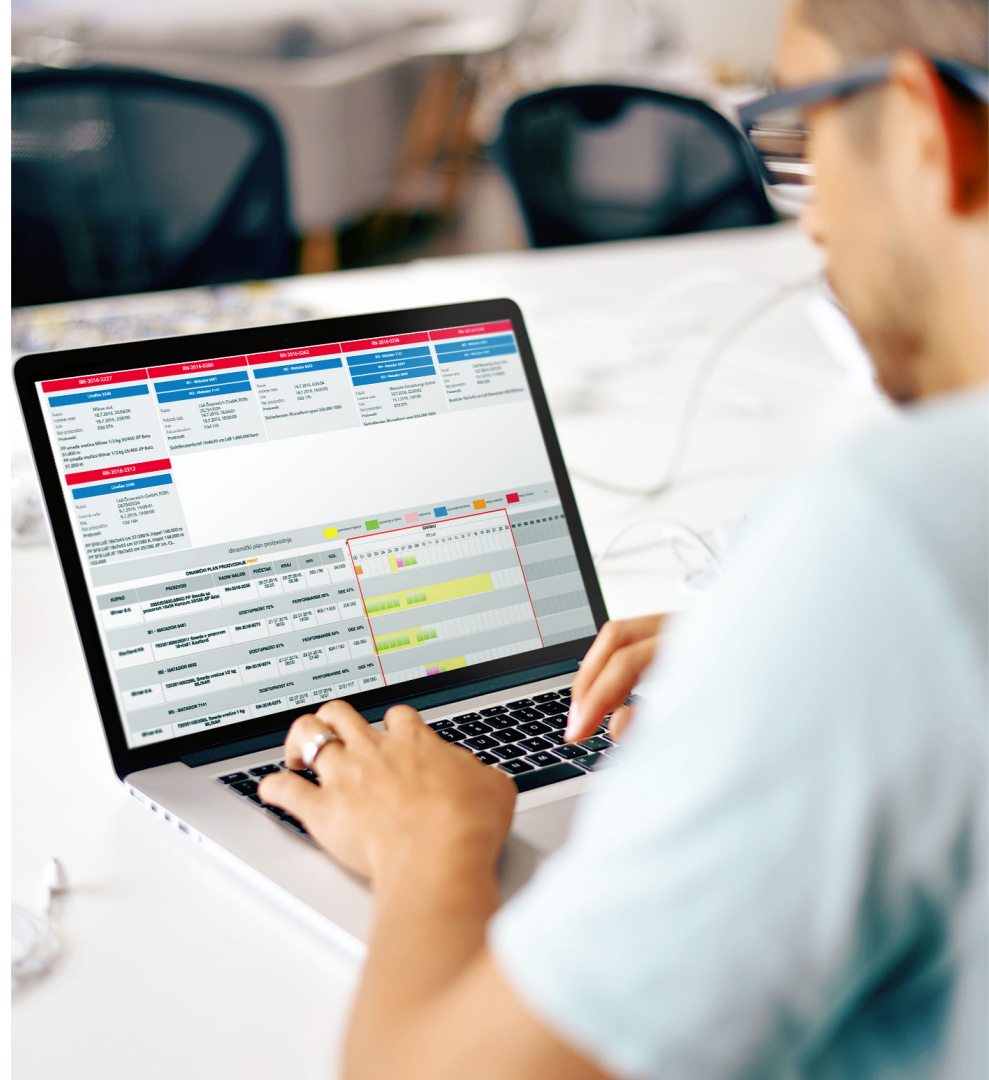

SME – carriers of economic growth

Problem

SME industry

Too slow or lack of feedback from manufacturing which would enable **prediction** of manufacturing process and **proactive** measures in solving problems to increase productivity.

Praćenje (tracking)

work order - QR code

workstation - tablet, rfid, worker

Analiza (analysis) – worker efficiency, deadlines, realized vs. calculated price, OEE...

Ušteda (savings) – result min 10-20%

Kontrola (control) – capacity fulfilment, delay prevention...

Big things are **NOT** ONLY for large and technologically advanced manufacturers.

- Visibility
- Transparency
- Security
- Availability
- Faster, smarter decisions 24/7

PAUK software and smart systems features

There is **no panic** in operation, all involved persons are alerted to possible problems on time.

Better communication of management and workers.

Finding issues we did not know existed.

Without any assumptions and speculations about new investments.

Human resources **optimization** according to the current state of production.

Simple and easy integration with complementary systems.

Workers **clearly see** whether they meet realistic goals and expectations.
