X-LOGIC

IOT DIGITAL TRANSFORMATION IN PRODUCTION PROCESS

CURRENT SITUATION

- Our client is manually measuring values from industry sensors

- The measured values are being scanned and stored in PDF file on our clients' servers

- Difficult tracking of measured values

- High manual cost

logic

IOT DIGITAL TRANSFORMATION IN PRODUCTION PROCESS

- Digital measurement with record in each stage of production process

- Solution includes: temperature & humidity sensors, central unit for data aggregation from each sensor, database for recorded values and server application for vizualisation and monitoring

- Communication: wireless

BENEFITS FROM IOT DIGITAL TRANSFORMATION

- Improved production process

- Significant cost optimization

- Improved information for production decision

- Improved information for business analysis

- Improved remote monitoring capabilities

- Developed visualization capabilities
